

*What people are saying about Capilex:*

*"My cat loves Capilex. The first day I tossed it in her food dish and she ate it later in the day. Since then, she takes it as a treat and comes running as I open it."*

*– Miguel, RVT, Glendale, CA*

*"Once I gave Capilex to my cats they stopped vomiting. I went one day without giving it and then Sammy vomited. Thank you! They LOVE it too."*

*– Cheryl M., Glen Carbon, IL*

*"Zoey loves the medicine; the only time she hesitated taking it was the first day but since then she actually "begs" for it. Thank you."*

*– Jayne S., St. Louis, MO*

# Hairballs?

*A Revolutionary Approach To Hairball Control*

# Capilex®

# Easy

## *Make Hairball Treatment a Treat*

Cats come running for our easy chews ... dose after dose after dose! No more fighting with your cat or struggling with messy gels.

Always the right dose every time ... with Bock Vet Pharma's patented IntegriDose® system! No more worrying if you gave the right amount.

At Bock Vet Pharma, Compliance Made Easy™ is the cornerstone of our company's mission. Our products can return harmony to your home while still allowing underlying health issues to be addressed. We understand the challenges of medicating your pets and how repeated stressful interactions can damage your relationship with them. This can lead to hiding and other "acting out" behaviors. With CAPILEX®, medicating your cat becomes a positive, mutually enjoyable experience and can actually strengthen the special bond you share.

# Effective

## *82% Overall Reduction in Hairballs Vomited*

CAPILEX works quickly to resolve your cat's hairball issues, with noticeable improvement in the first 2 weeks of use! Hairball frequency continues to decline over the following 1-2 weeks, reaching a level of control that can be easily maintained with continued daily use.

# Revolutionary

## *Not a Laxative or a Lubricant*

CAPILEX is a revolutionary new approach to hairball control. CAPILEX gently breaks down the hairball, allowing the ingested hair to pass out naturally in the stool. The food previously trapped in the hairball is freed, so it can be digested and made nutritionally available to your cat. Fewer hairballs mean a happier cat and a happier home.

CAPILEX does not contain petroleum by-products, such as mineral oil or white petrolatum, which can be found in other hairball remedies.

**Before Capilex**

**After Capilex**

CAPILEX does not require a diet change or rely on fiber for its effect. CAPILEX directly targets the hairball, freeing you from reliance on hairball diets and allowing you and your veterinarian the freedom to choose the diet that is best for your cat!

**Compliance Made Easy™**
